GitHub: https://github.com/princeraj05 Mobile: +91 7479845306

Skills

Languages: C++, Python, C, Java, JavaScript
Frameworks: HTML and CSS, Bootstrap, Node.js, React, Tailwind CSS
Tools/Platforms: MySQL, MongoDB, Git, Postman
Soft Skills: Problem-Solving, Team Player, Adaptability, Leadership, Critical Thinking

Projects

TeachHub | MERN Stack | Link — Feb' 26-Mar' 26

- Developed a comprehensive **school management platform** using **React**, **Node.js**, **Express**, and **MongoDB**, enabling seamless **role-based** access for **admins**, **teachers**, and **students** with **interactive dashboards**.
- Integrated robust **authentication** and **authorization** mechanisms using **JWT** to manage **secure** user sessions and restrict access across key modules like **attendance**, **exams**, and **class** operations.
- Enhanced **backend** efficiency by structuring **RESTful APIs** and refining **database queries**, delivering **real-time** communication with **Socket.IO** and a responsive UI built using **Tailwind CSS**.

Eco-Vision | *MERN Stack* | *Link* — *Oct' 25*-Dec' 25

- Engineered an AI-powered platform that converts **waste materials** into **practical upcycling** and **revenue-generating** business **ideas** through an interactive dashboard and intelligent **chat interface**.
- Integrated generative **AI models** with the backend to deliver structured **waste-to-value** insights, including product recommendations, required tools, **cost projections**, and **market** feasibility analysis.
- Enabled sustainable decision-marking by generating personalized reuse strategies that promote **eco-entrepreneurship** and **real-world adoption of green innovations**.

Inboxify | *HTML, CSS, Tailwind, JavaScript, PHP, MySQL*| *GitHub* — *Jan' 25*-Mar' 25

- Built a responsive and scalable **email management dashboard** with intuitive workflows to enhance user interaction and **streamline email** handling.
- Implemented **secure authentication** features including **login**, **profile management**, and session handling, ensuring reliable access control and data protection across user sessions.
- Streamlined dynamic content rendering and **real-time** interactions, **improving overall** usability and user engagement by **30%**.

Training

CSE Pathshala (EdTech Company) — Jun' 25-Jul' 25
C++ Programming OOPs / DSA

- Performed hands-on problem-solving in C++ using OOP concepts such as classes, inheritance, **polymorphism**, and **abstraction**, improving code modularity by **20%.**
- Analyzed Data Structures including arrays, **linked lists**, **stacks**, **queues**, **trees**, and **graphs**, achieving a **15%** improvement in algorithm efficiency.
- Architected and tested multiple DSA-based solutions (**sorting, searching, recursion, DP, greedy algorithms**) resulting in a **25%** enhancement in problem-solving speed.

Certificates

- ChatGPT-4 Prompt Engineering | Infosys — Aug' 25
- C++ Programming: OOPS and DSA | CSE Pathsala — Jul' 25
- Digital Systems: From logic Gates to Processors| Coursera — Oct' 24
- Unrevealing Basic Python towards ML/AI | CSE Pathsala — Mar' 24

Achievements

- **Solved 116+ Data Structures & Algorithms** on LeetCode covering arrays — Aug' 25
- **Qualified Round 2** of Code-A-Haunt 24-hour Hackathon organized by CodingBlocks — Mar' 24

Education

Lovely Professional University — Phagwara, Punjab
Bachelor of Technology — Aug' 23-Present
Computer Science and Engineering; CGPA: 6.83

Ganesh Dutt College Begusarai — Begusarai, Bihar
Intermediate — Apr' 21-Mar' 23
PCM; Percentage: 74%

Janta High School Khagaria — Khagaria, Bihar
Matriculation — Apr' 20-Mar' 21
Percentage: 88%
